Modeling Agency giving the client the ability to click to display certain portfolios.
- Vectorized and customized images using Adobe Photoshop and Illustrator.
- Contributed to UI development with CSS.
- Added and customized profiles for Client.
- Customized portfolio selections using Jquery.

SUMMARY

I'm a Software Engineer with a strong focus on JavaScript. 3 years experience with html and css. Skilled in the Mean Stack with working knowledge of other MVC frameworks. I started my Journey in 2013 working with Sk Models in progression of their site. From there I did projects on my own and developed a site for a non-profit organization called Life's Battles. I then found an opportunity to pair program and finish Clic Photography. From Clic photography I started working with nonprofit organizations like QCAIR and UBWC. In this process I was still developing personal projects like Candidates Voice and ManageU- a Finance tracking application. Currently I have experience with and Knowledge of Data Visualization with D3JS. Strong Desire to learn with experience in meeting deadlines on projects. Computer Science Knowledge which includes Data Structures, Algorithm Construction, Time and Space Complexity.
